

PREDICTS Symposium

14th September 2015

Neil Chalmers Room, Darwin Centre 2, Natural History Museum, London

Programme of talks

9:45am	Welcome (coffee and tea available)	
10:00-10:20	Projecting Responses of Ecological Diversity In Changing Terrestrial Systems: an overview of PREDICTS	<i>Andy Purvis & Jörn Scharlemann</i>
10:20-10:40	The PREDICTS database	<i>Samantha Hill</i>
10:40-11:00	Modelling and projecting the response of Colombian biodiversity to land-use change	<i>Susy Echeverría-Londoño</i>
11:00-11:30	Global effects of land use on the endemism of ecological assemblages	<i>Tim Newbold</i>
11:30-12:00	A policy perspective on PREDICTS	<i>Neil Burgess</i>
12:00-12:20	Local biodiversity is higher inside than outside terrestrial protected areas	<i>Claudia Gray</i>
12:20-13:00	LUNCH	
13:00-13:20	Generating phylogenies for PREDICTS with pG-It	<i>Dominic Bennett</i>
13:20-13:50	Effects of land use on bee diversity	<i>Adriana De Palma</i>
13:50-14:20	Land conversion and fragmentation as drivers of biodiversity change	<i>Helen Phillips</i>
14:20-14:35	Environmental drivers of the functional diversity of British birds	<i>Hannah White</i>
14:35-14:50	Recommendations for broad-scale biodiversity models from an independent field study	<i>Martin Jung</i>
14:50-15:05	PREDICTS underground - modelling the response of soil biodiversity to land use change	<i>Victoria Burton</i>
15:05-15:20	The next stage of PREDICTS	<i>Andy Purvis</i>
15:20-16:00	Informal discussions (coffee and tea available)
